

Mid-Level/Senior Software Developer Frontend (f/m/d)

We at The Ego Company GmbH believe that everyone has the right to manage and protect their own personal information. That's why we need YOU - a competent and passionate software developer in the front-end - to help us achieve our goal: the creation of a revolutionary new digital identity management app: myEGO.

Our app is developed using React Native, but it's more than that: it's a sophisticated cross-platform (iOS/Android) app that solves a complex problem that keeps us busy in our daily lives. The app uses state-of-the-art libraries and some modules require a native iOS/Android implementation in addition to the main JavaScript code base. Our backend is primarily based on Node.js and blockchain technology (IBM Hyperledger Fabric). Our infrastructure is hosted at Amazon Web Services.

Your responsibilities

- Further development of our web-based platform in the front-end area
- You work together with the entire myEGO team on an innovative platform for the digitalisation of identity
- As a member of one of our Scrum teams you will further develop the product myEGO, based on React Native, React JS, (Node JS, Hyperledger Fabric)
- You will take responsibility for the specification, conception and implementation of designs and functionality for the web portal (B2B) and the React Native App (iOS and Android)
- You live the values of agile software development within the company and drive it forward.
- In our self-organized development teams you will analyze, design and implement user-friendly and innovative web applications based on the latest technologies.

Your profile

- University or college degree in computer science, business informatics or a comparable degree
- At least 2 years of experience in software development with React Native and/or React (and Redux) with special focus on web and mobile applications
- Advanced JavaScript developer and knowledge in Typescript
- Understanding in the use of REST interfaces
- Development of barrier-free, high-performance applications
- Interest in complex systems and in learning/testing new technologies, languages and frameworks
- Understanding of CI/CD
- Flexibility, ability to work in a team and a high level of commitment
- Fluent in German and English

What we also wish you have....

- Experience in mobile development (Android, iOS)
- Experience in working with SQL databases (PostgreSQL)
- Experience in handling automated tests (unit tests, acceptance tests)
- Knowledge in handling container technology (docker), AWS cloud solutions

Your benefits with myEGO

- Open-minded and dynamic start-up with flat hierarchies
- Agile working method and home office possibility
- Personal development in a team
- Flexible working time model
