

Special Offer for Startups

#Stay Digital #Stay Secure

myEGO is a management platform for Self-Sovereign Identity based on blockchain technology. Consequently, the user is in the focus of our solution, whereby data management and processes are newly thought and developed.

With our solution, partner companies can implement digital and smart processes and take onboarding to a new level. Our strong user-centric approach support businesses to switch to contactless verification processes today in order to achieve long-term and sustainable processes.

OUR STARTUP SPECIAL

You are a startup that has not yet completed a Series A Finance round? Use myEGO verification process as an add-on (automatic verification/KYC, e.g. EU ID, email, phone)

Standard Package

- Free onboarding & set-up fee & technical support
- 2 months free with one-year contract term

SUSTAINABLE

The crisis demands quick developments of digital solutions. We want to enable businesses to keep digital and secure processes long-term. We want to accompany you now and after the crisis.

TRUST

Since we have to move fast into a more digital sphere, we have to make sure that we can trust one another - that a person is who they say they are. myEGO can support with contactless verification.
